Professional Summary

AWS Cloud and DevOps enthusiast with practical experience provisioning and managing **scalable cloud infrastructure on AWS**. Experienced in **EC2, VPC, IAM, Auto Scaling, and CloudWatch**, with strong knowledge of **Terraform-based Infrastructure as Code (IaC)** and **Jenkins-driven CI/CD pipelines**. Passionate about **automation, cloud security, and optimizing cloud resources for performance and cost efficiency**.

Skills

- **AWS Services:** Ec2, S3, RDS, Lambda, VPC, IAM, Route53, ECS, EBS, Auto Scaling, etc
- **CI/CD Tools:** Jenkins, GitLab, CI/CD, GitHub Actions, AWS Code Pipeline, AWS Code Build, etc.
- **Infrastructure as Code (IaC):** Terraform, Ansible
- **Containers & Orchestration:** Docker, ECS, EKS,
- **Version Control Systems:** Git, GitHub
- **Monitoring Logging:** AWS CloudWatch, prometheus, Grafana
- **Operating Systems:** : Linux (Ubuntu, Amazon Linux)
- **Networking:** DNS, Load Balancers, VPN Firewalls, VPC Peering, Subnets, Route Tables

Internship

DevOps Engineer – GreateWay Software Pvt. Ltd., Pune

June 2025 – Present

- Provisioned and managed AWS services including EC2, S3, IAM, and VPC.
- Implemented CI/CD pipelines using Jenkins and GitHub for automated build and deployment workflows.
- Built and managed Docker containers to standardize application testing environments.
- Automated operational tasks using Shell scripting to improve deployment efficiency and reliability.

Projects

1. Automated Multi-Tier Web Application Deployment on AWS

- Deployed a highly available multi-tier web application using Terraform, EC2, RDS, Load Balancer, and Auto Scaling.
- Automated AWS infrastructure using Terraform (IaC) and shell scripting.
- Configured EC2 Auto Scaling, Load Balancer, and RDS for high availability.
- Managed CI/CD and version control with Git, GitHub, and Jenkins.
- Optimized performance with CloudFront, Route53, and CloudWatch monitoring.

2. Automated AWS Infrastructure Deployment using Jenkins, Terraform & Poll SCM

- Developed a parameterized Jenkins pipeline integrated with Terraform and AWS to automate provisioning and destruction.
- Built a Jenkins pipeline to automate Terraform apply/destroy operations.
- Integrated GitHub and Poll SCM for automatic pipeline triggers.
- Configured AWS credentials securely and implemented CI/CD for IaC workflows.
- Automated end-to-end AWS provisioning with zero manual effort.

Education

BE. Computer Engineering :

Savitribai Phule Pune university (SPPU)

Certifications

AWS and DevOps - Issued by Fusion Software Institute, Pune
